

BLOOM Project

Project Reference: shop.shajgoj.com

Name of the website: Bloom

It's a beauty product shopping website.

Has homepage displaying each type of product as highlights.

There will be one navigation bar. 1st option will be categories, its option will be by default showing. And the options of categories are- Makeup, personal care, natural, tool and accessories, k-beauty, fragrance.

2nd part is brands, 3rd will be beauty blogs.

Above we have search bar, login icon, cart icon.

Each product has name, ml, rating and price (BDT), add to cart option and also a link to its own page.

The page shows full description of that product, quantity, add to cart option, clear image, rating, reviews and also some recommendation of small products (mask, scrub, face-pack, gel and just in general skin care products).

And lastly comes the check-out option:

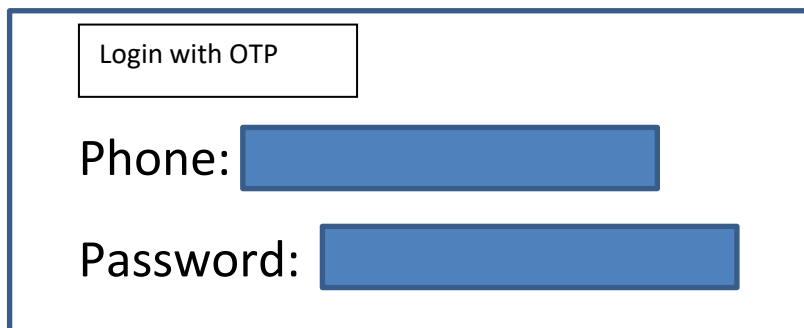

The icon for check out option always stays on page, on the right part, beside the scroll bar.

When customer click the icon, it takes to the page where it shows the quantity and the price accordingly. Down below the page, there will be an option 'proceed'

Click procced-> comes a page of Billing and shipping:

There will be two options-1) Login (If you have already created an account)

2) If not, then create an account:

A screenshot of a login form. At the top, there is a button labeled "Login with OTP". Below it, there are two input fields. The first is labeled "Phone:" and the second is labeled "Password:". Both input fields are represented by blue rectangular boxes.

Or, Login with email and password

|

|

After login, a page comes up to display billing and shipping.
